

auric

*The company auric barrels ltd.
is a German-Croatian partnership
located in Croatia, in the heart of
more than 15.000 hectares
of privately owned
natural Slavonian oak forest.
All forest is FSC® certified.*

From the heart of Slavonia

The company auric barrels ltd. is a part of the auric oak group. Our understanding of sustainability inspires us to work with our material very conscientiously. Even before founding the company in 2016, we started the production of the first elements for the barrels. Our staves age up to 36 months.

Since 2015 our main focus has been the production of a stock with the supreme quality of materials. In the last several years we have had a consistent supply of a sufficient amount of elements, which allows us to be a trustworthy partner for our clients from the first day of production.

Being a new company on the market, we are aware that we need to work on gaining trust from our future clients. We have therefore recruited some of the leading barrel craftsmen from Croatia to be a part of our team.

Having recently started with the barrel production, we can proudly say that we are the only barrel producer who is able to deliver barrels ranging from 50 liters of volume to 1.000 liters of volume, all in one production line.

The production line and the exceptional traits of our material result in the highest technical quality of barrels.

CAPACITY OF COOPERAGE:

- stock of logs • 3.000 m³
- stock of stave • 2.200 m³
